

PERENNIALS THAT WORK IN THE SHADE

Gardening in the shade has the reputation of being difficult, but it doesn't have to be. By choosing the right partial shade or shade-loving plants, it's possible to have a beautiful landscape even in limited light. Some of the most popular garden plants are reliable standbys for a reason: with the right location and care, they provide season-long enjoyment even for novice gardeners.

Here are some suggestions for partial shade or shade plants to get you started on the road to a lush, shady oasis. **Gardener Tip:** Make sure to read the grower tag on the plant to help determine the amount of light that is required for that variety.

Perennials and Shrubs for Partial Shade

Ajuga	Clematis	Hosta	Pulsatilla
Akebia	Clethra	Hydrangea	Rhamnus
